

INDOFIL B-41

Special Soft Acrylic Resin Binder

PHYSICAL PROPERTIES:

Composition	:	Anionic aqueous acrylic emulsion
Appearance	:	Milky white emulsion
% Solids	:	40 ± 0.5%
pH(1:10)	:	8.0 – 9.0
Mechanical stability	:	Excellent
Charge particle size	:	fine

DESCRIPTION:

Indofil B-41 is soft acrylic resin binder specially designed for finishing of all types of high quality shoe soft uppers, linings & all milled leathers. It gives good adhesion, good covering & high flexibility to the leather. In garment & gloving leathers it imparts soft handle and natural grain look without loading.

Indofil B-41 imparts following unique properties,

- Gives soft clear and flexible film
- Excellent adhesion properties and good covering
- Can be plated at high temperature & good print retention
- Helps in maintaining soft handle & natural look
- Good dry & wet flexes
- Good cold crack resistance
- Compatible with all anionic finishing auxiliaries

APPLICATION:

Indofil B-41 is lightfast soft acrylic dispersion well suited for finishing of full grain & corrected grain leather with good adhesion, high covering and flexibility. It is recommended for finishing of linings & garment leathers where soft handle & natural aniline look of finish is very important. It can be used alone or in combination with other resin binders in finishing.

Indofil B-41 is recommended 100 – 300 parts in base & intermediate coats.

STORAGE STABILITY:

6-9 months if properly stored in cool & dry place under shed in sealed drums.
