

INDOFIL LACQUER EC

Water & Solvent Soluble Top Coat

PHYSICAL PROPERTIES:

Composition	:	Nitrocellulose formulation with special additives
Appearance	:	Colourless to slight pale yellow liquid with little haziness
Film character	:	Clear, glossy.
%Solids	:	25% ± 1.0%
Solubility	:	Soluble in water & butyl acetate

DESCRIPTION:

Indofil Lacquer EC is water and solvent dilutable top coat lacquer having extremely good flow properties and produce clear water resistant finish. It imparts high gloss to the finish.

Indofil Lacquer EC imparts following unique properties,

- High solid content product
- Imparts high gloss with good touch
- Excellent dry & wet rub fastness
- Exhibits good plating properties at high temperature
- Soluble in water as well in solvent
- Compatible with selected feel modifiers
- Demonstrates good milleability.
- Easy miscibility with water and good flow properties
- Excellent storage stability

APPLICATIONS:

Indofil Lacquer EC is recommended as top coat for full grain & corrected grain shoe uppers, leathers goods & milled leathers. It has built in capacity to emulsify easily in water by simple stirring.

Indofil Lacquer EC will give better gloss & fastness properties in solvent than water.

Indofil Lacquer EC is recommended to dilute in water or solvent in 1:2 ratios & to be sprayed as per gloss & fastness requirements of leather article.

STORAGE STABILITY:

6-9 months if properly stored in cool & dry place under shed in sealed drums.
