

## INDOFIL VM-36

### Medium Soft Acrylic Resin Binder

#### PHYSICAL PROPERTIES:

Composition	:	Anionic aqueous acrylic emulsion
Appearance	:	Milky white emulsion
% Solids	:	36 ± 0.5%
pH(1:10)	:	7.6 – 8.6
Alcohol tolerance	:	Diluted to 20% solids - excellent
Mechanical stability	:	Excellent
Charge particle size	:	fine

#### DESCRIPTION:

**Indofil VM-36** is medium soft acrylic resin binder specially designed for finishing of all types of uppers, shoe softies, all milled and saddlery leathers. It gives low tack with superior adhesion, good covering & high flexibility. It also imparts good print retention.

**Indofil VM-36** imparts following unique properties,

- Gives tough clear and flexible film
- Imparts low tack & good plate release
- Outstanding adhesion properties and good covering
- Can be plated at high temperature & good print retention
- Good dry & wet flexes
- Good cold crack resistance
- Compatible with all anionic finishing auxiliaries

#### APPLICATION:

**Indofil VM-36** is lightfast acrylic dispersion well suited for finishing of full grain & corrected grain leather with good adhesion, high covering and high flexibility. It is recommended for finishing of saddlery & belting leathers where toughness & flexibility of finish is very important. It can be used alone or in combination with other resin binders in finishing.

**Indofil VM-36** is recommended 100 – 300 parts in base & intermediate coats.

#### STORAGE STABILITY:

6-9 months if properly stored in cool & dry place under shed in sealed drums.
