

LEATHER CHEMICALS

(Formerly known as Indofil Organic Industries Ltd.)

INDOFIL C-20

Specialty Wax Dispersion

PHYSICAL PROPERTIES:

Composition	:	Anionic proprietary blend of special waxes
Appearance	:	Off white pourable viscous liquid
% Solids	:	15% \pm 1.0%
pH (1:10)	:	7.5 - 8.5
Solubility	:	Readily soluble in water

DESCRIPTION:

Indofil C-20 is dispersion of soft synthetic waxes with very fine particle size. It can be used for all kind of leathers like shoe uppers, softies, garments & milled Leathers. It also can be used in saddlery & belting leather finishing as a plate release agent.

Indofil C-20 imparts following unique properties,

- Gives good plating & embossing property
- Gives good filling when used in base coats
- Imparts silky & natural feel to leather
- Compatible with other anionic finishing chemicals
- Can be used in top coat for warm & silky touch
- Recommended for shoe uppers, upholstery, garments & splits

APPLICATION:

Indofil C-20 is soft wax emulsion mainly recommended for base coat & season coat application for full grain, corrected grain uppers & softies. It is having a fine particle size & strongly recommended for nappa & milled leathers with natural look & warm finish.

Indofil C-20 can be used up to 50 parts/liter in top coats for warm & silky handle.

Indofil C-20 is recommended 50-100 parts/liter in season coat in finishing.

STORAGE STABILITY:

6-9 months if properly stored in cool & dry place under shed in sealed drums.
